ULTRASONIC AND ACOUSTIC PORTABLE SPEECH PROTECTOR

Description

The SANTOR portable speech protector is the most sophisticated device on the market to protect your confidential conversations. With two modes of protection, you can covertly protect your voice or activate the acoustic jammer to insure your private communications.

Have any questions?

Call us at 514-259-4884.

This speech protector is for individuals looking to protect their conversations from recorders or audio microphones (cellular phones, tablet computers, digital voice recorder, wireless microphones or with wire, etc).

During an important business meeting we must ensure the protection of our pieces of oral information so that they remain confidential. A voice recording may be used as a blackmailing tool and can even destroy a reputation. Our discreet system enables you to have a highly protected conversation with your interlocutor and protecting your interests.

It uses inaudible ultrasounds to secretly cover any recording with scrambled sounds.
