This high quality voice recorder is also a high quality looking pen. It allows you to bring it under any circumstances. Furthermore, it can record voices and sounds in a periphery of more than 6 meters with crystal clear audio quality. It is simple to use; simply slide down the clip to start recording or slide it up to stop, voice activated system also available. Then connect it to your computer to listen to your recordings, Another way to listen to your recordings: the accessories include an earpiece kit that you can use to playback and manage your audio files.

It works with MAC or Windows; no extra software needed to play back your files.

Of course, it does write, with black ink from a high quality ball point. Two extra ink cartridges are included with the accessories.
